PROFESSIONAL EXPERIENCE

Volunteer Intern — K.V. Jan Kalyan Trust

June 12, 2025 – June 20, 2025

- Assisted in managing digital data pipelines and structural organization of community records.
- Streamlined internal database architectures to improve search layout efficiency and data retrieval.
- Maintained local technical solutions for data management and regular reporting frameworks.

EDUCATION

B.Tech in Computer Science & Engineering — Lovely Professional University

July 2024 – Present

Core foundational and advanced coursework in software development, engineering principles, and database management systems.

TECHNICAL SKILLS

Languages & Frameworks: React, Node.js, Python, Tailwind CSS, REST APIs

Developer Tools & Infrastructure: Git, GitHub Copilot, Notion, Domain Hosting & Server Deployment

Core Systems: NLP Systems, Database Query Optimization, Data Architecture, Structural Verification Matrix

KEY HIGHLIGHTS & TECHNICAL COMPETITIONS

- AI for Bharat Hackathon (April 2026):** Collaborated on developing custom localized AI components and language processing configurations.
- Tech Blitz TechSprint (February 2025):** Participated in an intensive multi-day sprint engineering responsive feature iterations and application structures.
- Gen AI Exchange Hackathon by Google (October 2024):** Designed generative layout patterns and smart context flows within a competitive rapid-prototyping window.
- Leadership Edge Event, LPU (February 2025):** Selected to join a leadership development cohort focused on project management, technical scaling dynamics, and cross-functional project ownership.
